Python full stack developer works on both the front-end and back-end of an application. Designing and developing the user interface of a web application. use HTML, CSS, and JavaScript to create user-friendly and interactive interfaces. developing the server-side logic of a web application. use Python frameworks like Django and Tkinter to build scalable and secure back-ends. use SQL databases to store and retrieve data efficiently.

Project's

1.Patient Details Management System

- Developed a patient details management system with Django, Python, HTML, CSS, and SQL.
- Created and managed patient records, ensuring efficient data storage and retrieval.
- Designed responsive and user-friendly interfaces for optimal user experience.

2.Medical Management System

- Built a medical management system using Python, Tkinter, and SQL.
- Managed medical records and user-friendly interfaces with Tkinter.
- Used SQL for database management and data retrieval.

3.Library Management

- Developed a library management system using Python and OOP principles.
- Implemented book lending, returning, and inventory management features.
- Utilized OOP concepts for modular, scalable, and maintainable code.

Educational Qualification

- **Yadava college, Madurai.**
  Master of Information technology
  2021 - 2023 (73%)

- **Syed Ammal Arts And Science College, Ramanathapuram.**
  Bachelor of Information technology
  2018 - 2021 (79%)

Technical Skills

- Python
- Django Framework
- Tkinter Framework
- SQL
- HTML5
- CSS
- Javascript
- GIT

Certification

- **Full Stack Python Development In**
  KaaShiv InfoTech, Chennai.
  (Nov -23 | May-24)

- **Final Year Project -Internship In**
  Elysium Technologies, Madurai.
  (Dec-22 | Apr 23)

- **SRM Infotech, Workshop On Python In**
  Syed Ammal Arts and Science College, Ramanathapuram.
  (Oct-2018)

Language

- Tamil
- English
